TrucPro

FLEET MANAGEMENT SYSTEM

Delivering Excellence
Every Turn of the Way

TrucPro Fleet Management System is an expert cloud-based software service with superior dispatching, accounting & tracking as the core modules that delivers excellence in managing and maintaining fleets. We specialize in offering large company solutions to small and medium sized logistics businesses at a price that provides outstanding value and a clear return on investment.

TrucPro users can locate and map the real-time live location of a truck and provides access to arrival and departure time monitoring for different sites. A wide range of other helpful features, tools, and reports are available to assist in analyzing the operations to optimize productivity and maximize efficiency.

We are here to save you time, trouble, and money. The architecture of our service is cleverly designed to be simple to learn and easy to use, yet highly specialized. It is easily configured to custom fit a broad range of transport methods. Our highly configurable applications and modular approach to development ensure all your needs are met in the most efficient and convenient way possible.
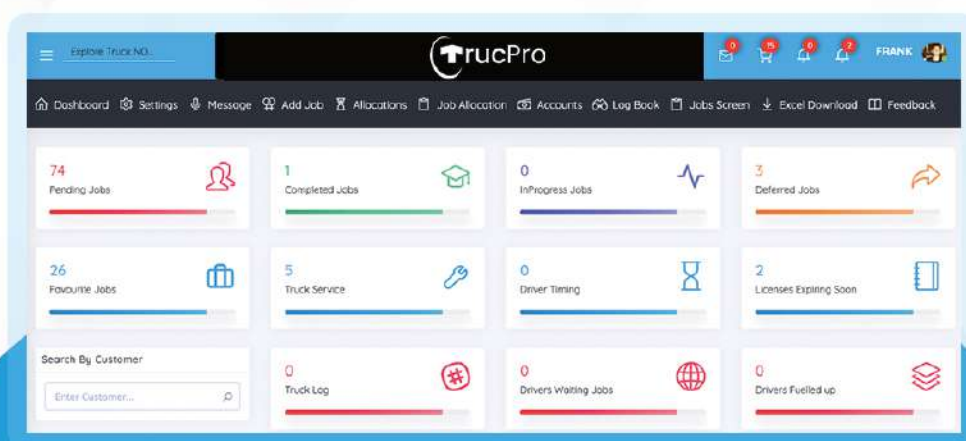

ABOUT TRUCPRO

Fleet and freight movements are integral to industries worldwide, whether it is logistics, utilities, manufacturing, transportation, or others. Companies need a next-gen solution that can enhance visibility and control, optimizing productivity. Create and Allocate Jobs

In this module section of our software, users can create different types of jobs in various arenas with the option of implementing multiple pickups and multiple drop-offs as well. Our highly specialized features are available to join two or more jobs to one job and transfer the job between the trucks. If required, a job with multiple legs can be split into different jobs and add/move a leg from one job to another. Whatever can optimize the result of a job, the software is able to make possible. The end goal is to promote productivity by utilizing whatever measures it takes to make it happen.

Jobs can be allocated to the drivers who can then conveniently view them on their App. The order of the job that is allocated to a driver can be re-aligned or, even re-assigned if necessary. Different tabs on the program are available to view the status of the job such as when it is completed, in-progress, pending or deferred. With this software program, you will never have to waste your time guessing, wondering, and worrying ever again.

With our software, upon completion of a job, the admin gets a notification that minimises the waiting time of the driver. When a driver finishes a job, software suggests the time and distance it will take to get to all other jobs so that the most efficient job can be allocated next. Let our software do the work for you. This time-saving technology is a great example of how this service will return your investment.

Helpful Alerts

Our innovative software also provides timely alerts that help you keep your fleet running smoothly including expiration of drivers' licenses, services due on trucks, pre-departure check lists and issues, and even employee birthday reminders.

Accurate Accounting

When you turn to our solutions, the complex web of manual processes and paper handling in accounts payable will instantly become obsolete. With our electronic invoicing solution, you can streamline your invoicing, automate the payroll process, and dramatically reduce processing costs and errors. The system calculates the drivers' wages and even displays them on their Apps.

The program also delivers you the best outcomes such as instantly syncing account receivables and payables. Our efficient and effective solution-oriented software program helps in avoiding double data entry and saving your business time. This module fulfils all the accounting requirements of trucking companies and makes headaches and hassles a thing of the past. Good riddance!

Despite a strong accounting system, if the customer still prefers using any other specific accounting software, our system has a simple integration with all the popular software in the market. You will therefore be able to accommodate the wishes of your valued customer in one smooth and simple transaction. Customers appreciate things like that.
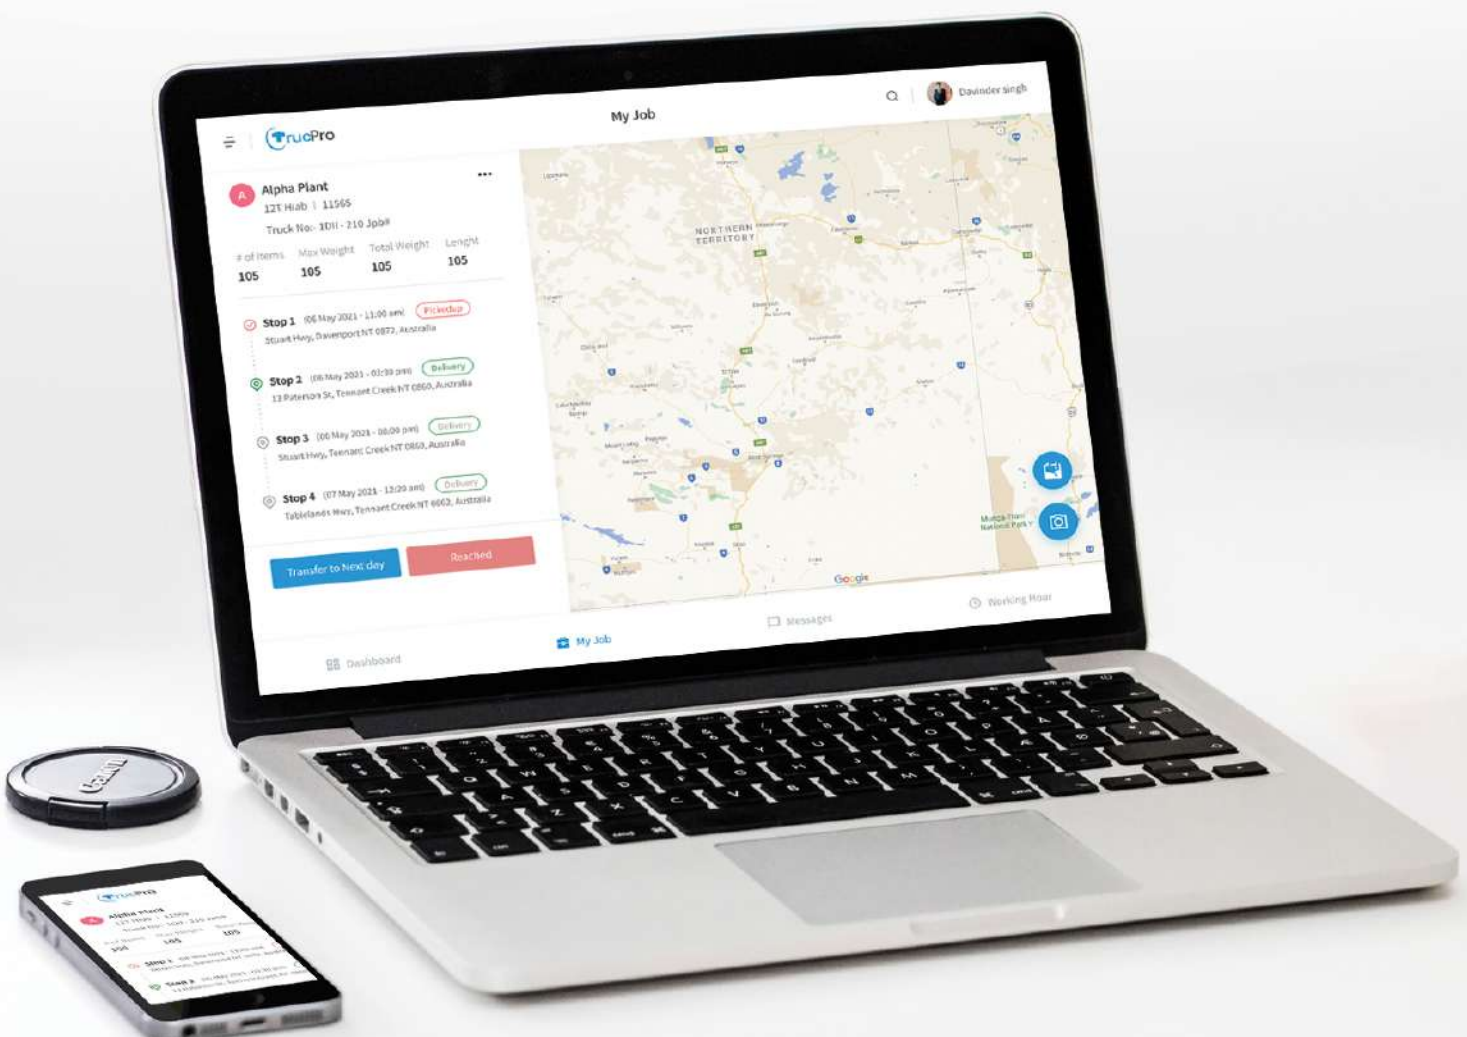

Maximized Mobile App for the Drivers

You depend on your drivers for production and your drivers depend on you for instructions. Now, both you and your drivers can have what you need to get the job done in record time with minimal effort. Our Drivers App can implement tailored instructions to increase safety, customized to the highly specialized details of your company.

This module is designed to frequently send location updates back to the system, which permits companies to track their drivers and freight, once again saving time and money.
When you have our program, your staff does not have to go to the trouble and inconvenience of entering the timings of the job for invoicing ever again as these are automatically picked from the driver App.

Many other optimizing features are available to take your company to the next level. You will be able to utilize the convenience of electronic signing which is an excellent improvement for you, the driver, your office staff, and your customer. The App allows for capturing of the receivers' names, signatures, photos, and GPS coordinate of deliveries. Geotags, timestamps, vehicle checks, barcode scanning, and drivers' notes are among the myriad of other features highlighted in our software. Whatever saves you time and money and improves the way you manage and maintain your fleet can be implemented into your customized software experience. If it matters to you, it matters to us and we will make it happen.
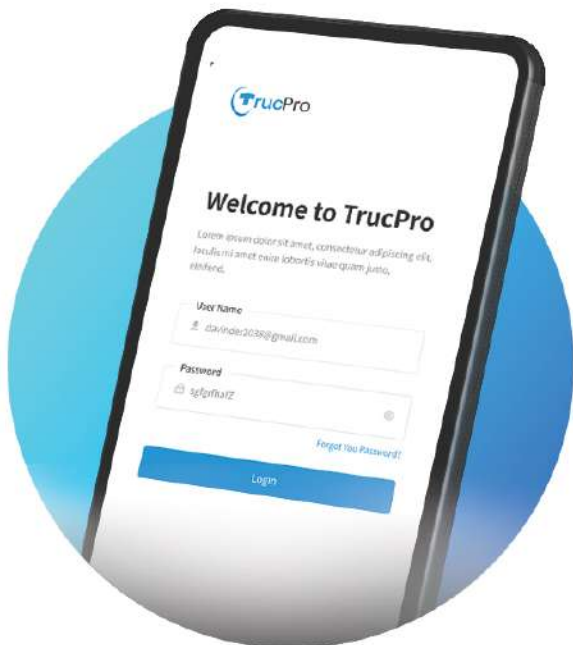

Take Care of Your Customers

Customers make your business go round. When you take care of your customers, they will take care of you. Our software enables you to tend to your customers' needs so you can provide the ultimate experience for them.

All aspects of TrucPro Fleet Management System have been designed and developed to empower you to focus on your customers by maximizing the control of your logistics business through the features you will have available to you. These capabilities enable you to create and maintain a highly engaged relationship with your customer and promote a reputation of trust and dependability.

The customer portal is highly configurable so that you can include all your own business requirements while meeting your individual customers' requirements as well.

- ✔ Booking a new job
- ✔ Real-time job tracking through dashboard
- ✔ Driver's location visualised via Google maps
- ✔ Confirmation of deliveries and POD via email notifications
- ✔ Capacity to access advanced searches and full job history
- ✔ Verification of customer booked jobs through automatic or manual process
- ✔ Viewing of statements and invoices
- ✔ Creation and management of users for login

Do not think your customers will not notice the fact that they no longer need to go out of their way. They will notice and they will appreciate you for it too.

Because our software is tailored to your individual needs, you will have powerful tools at your fingertips such as the ability to customize consignment progress information that can be emailed not only to individual customer contacts but also to contacts of your choice at each delivery location.

Solutions

We offer solutions for all trucking services, specializing in accommodating the specialized needs of mid to smaller companies. If you associate your logistics and transport company with one or more of the following classifications, we are here to help you maximize your production and minimize your headaches:

Courier

General Freight

Bulk Hauling

Heavy Hauling

Sales & Distribution

Movers & Packers

Taxi Truck

Ingenious Invoicing

Invoicing has never been simpler than with our software. We work hand-in-hand with you to customize how and who you invoice. Create and send customer invoices that cater to the different turns and specific agreements you have with each individual customer. No more embarrassing mistakes or costly errors. Our invoicing system is second to none.

Invoicing options you will have access to include invoice grouping, invoice layout, invoice frequency, and your designation of invoice delivery method. The optimization and organization within the invoicing features help prevent revenue leakage through missed charges.

Premium Pricing Program

Pricing is a complicated, painstaking process that can easily go wrong with human error. When you trust us with your company's needs, gone are the days when pricing was a pain. We make the once-dreaded task a breeze by eliminating the possibility of revenue leakage by missing to charge any job.

Pricing and rate calculation features within our software allow you to fully automate your pricing. Manual pricing, service-based pricing, hourly charges, additional charges, price per mile, breaks in rates, and most any other type of pricing are available through our systematic approach. Rates for some customer can vary, therefore the software creates a special invoice for the customer that will use that customers' price for generating the invoice. Let us help you help yourself by determining what your scope of pricing entails and finding a tailored-fit plan that embraces each one.

And... So Much More

If you can imagine it, we can bring it to life. After all, that is what we do. We are experts in enhancing every aspect of your fleet management and maintenance from start to finish while elevating your customers' experience in the process. Our highly customized, creative approach is what sets us apart and what will set YOU apart too.
